

# Belt Conveyor

## Powerful and versatile

Our belt conveyors represent the most powerful and versatile conveyor for horizontal or rising transport of bulk materials. They transport reliable, product- friendly, flexible and above all with low power consumption and almost silently. With low drive power, large flow rates are possible.

- Material: Galvanized / painted steel or stainless steel
- Welded frame construction
- Stored tail pulley
- Carrier roller
- Cornering grip rails with rubber seal
- Conveyor belt available in different variants
- Drive through maintenance-free drum motor or slip-on motor
- Chassis
- Optional self-driving
- Height adjustment hydraulically, electrically or via hand winch

### Special benefits:

- Product- gently
- Quietly
- Versatile and flexible
- Large flow rates with low drive power possible
- Low wear
- Low maintenance
