

About us

Kessens plans, delivers and constructs turnkey systems for the storage, conveying and processing of bulk materials. Whether new construction or technical renewal of your plant - across Europe, many hundred customers already count on the know-how, the consulting strength and the reliability of Kessens.

Our services in overview:

- Storage technology
- Conveying technology
- Processing technology
- Special machines

STORAGE TECHNOLOGY

Corrosion-resistant silos
made of
glass fibre reinforced plastic

Smooth-wall silo made of
steel for bulk material
with high density

Galvanized flat bottom silo
made of corrugated
steel profile plates

Tailor-made square silo
made of steel for
optimal use of space

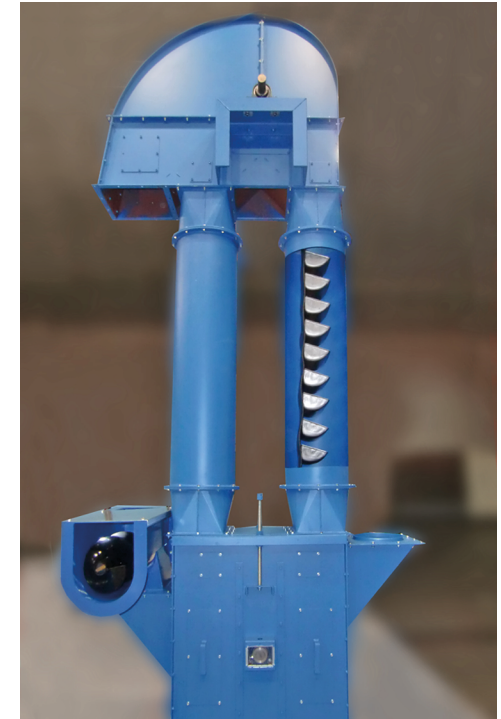

CONVEYING TECHNOLOGY

Trough screw conveyor in robust construction for many application possibilities

Trough chain conveyor made of galvanized steel for high performance and very gentle conveying

Pipe screw conveyor in various versions and sizes for reliable conveying

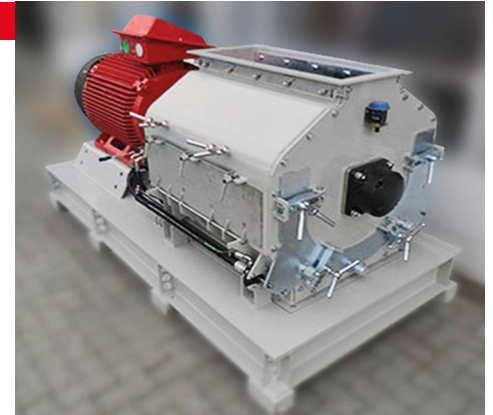

Bucket elevator for high flow rate with minimum space requirements

PROCESSING TECHNOLOGY

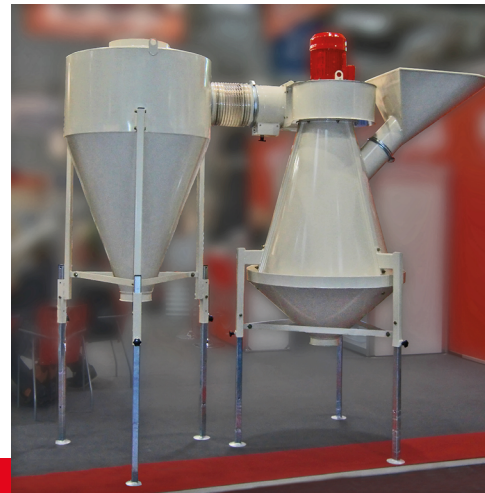

Horizontal and vertical mixer for many application possibilities with high mix accuracy

Hammer mill with robust housing for long life and great performance

Precleaner with powerful blower for very good and high cleaning performance

Press for an optimal final product

Cooler with simple control for gentle and safe product treatment

SPECIAL MACHINES

Mobile loading station
with buffer storage

Mobile belt conveyor
with big receiving hopper
for gentle conveying

Dosing system with
receiving container
and sieve cleaning
