

Precleaners

Professional cleaning of production goods

Precleaner

Functional principle:

The Kessens Precleaner operates on the principle of air classifier. All lightweight components are thoroughly vacuumed. The extracted dust- air mixture is purified via a cyclone.

Stationary version up to 60 t/h

Mobile version up to 60 t/h

Your benefits:

- Very good and high cleaning performance by powerful blower
- Optimal airflow due to the rotating serrated washer
- Infinitely variable air flow regulation
- All types in mobile or stationary version

Type	Motor	Capacity
KS 14	0,75 kW	14 t/h
KS 30	3,00 kW	30 t/h
KS 40	7,50 kW	60 t/h

- Inlet hopper with protective grating
- Drive station for screw conveyor
- Quantity regulation slide

- Casters
- Electric control

- Discharge height variable by the length of the screw conveyor
